

Digital Developments

exceptional creative weekends

24/25 October 11.00-5.00pm

Found Sound Stories

Tutor: Janek Schaefer

Field recording, performance and the physical manipulation of found sounds using an array of recording devices, turntables and MiniDisc. Award winning composer and sound artist, Schaefer introduces a laptop-free zone in which to record and imagine an active audio narrative, leading to improvised performance.

Full price: £118.00 / Members price: £114.00 / Conc price: £115.00

7/8 November 11.00-5.00pm

Using Sensors for Performance and Installation

Tutor: Nic Sandiland

Control and manipulate digital video and audio in a real time environment using infra-red, ultrasound and distance sensors coupled with the Arduino micro-controller. A weekend combining practical instruction with creative input. Nic Sandiland is a multi-media artist working with installation, performance and film. Price includes Arduino Duemilanove Board, infra red sensors and all components.

Full price: £136.00 / Members price: £132.00 / Conc price: £133.00

21/22 November 11.00-5.00pm

Experimental Digital Printmaking

Tutor: Janet Curley Cannon

Experiment with printing on to different papers, collage materials, fabric, and/or applying digital transfers to other surfaces using Ink Aid. The emphasis will be on exploring and experimenting with digital images using the Epson 7600 large format printer. Participants should have a working knowledge of Photoshop. Price includes materials and 1 x A2 art print.

Full price: £124.00 / Members price: £120.00 / Conc price: £121.00

28/29 November 11.00-5.00pm

Circuit Bending: Atari Punk Console

Tutor: Professor ASMO

Benefit from expert guidance to build a custom-modified version of Forrest Mims' Stepped Tone Generator or Atari Punk Console electronic noise-maker synth from bare components, with additional amplifier stage and five step sequencer. Price includes all components.

Full price: £118.00 / Members price: £114.00 / Conc price: £115.00
